

Technology Sector

Based in Bristol, we're at the heart of a region that is a dynamic hub for leading edge technology and media businesses. Over the years, we've established RM as a highly rated adviser in this local network - working with incubators such as SetSquared and QTEC.

Our tech client portfolio is heavily weighted towards B2B, 'deeptech' solutions in areas such as fintech, insuretech and wireless comms. Not household names, but the tech enabling those names. What all our clients in this area have in common is that they are innovators; pushing boundaries in their own fields, and creating new ways of doing business.

Why Roxburgh Milkins?

Above all, what our clients need from their lawyers is the ability to understand their idea, quickly grasp its commercial potential and apply this understanding when giving advice. Our lawyers are recognised by the legal directories as being "well-known among Bristol start-ups and scale-ups" and for being "commercially astute", "attuned to the needs of the client's business" and for "always providing very pragmatic advice".

How we can help

Most of the tech companies we work with are on a growth path. We assist with:

Corporate

Helping companies with their funding rounds, working closely with founders, management and external investors.

Seed and incubation funding, Series A and Series A extension - **£20m+ raised.**

10+ funding rounds, **£50m+ raised in total.**

Commercial

Advice on grant funding and collaboration agreements (for example Innovate UK funded agreements) and with drafting and negotiating customer contracts. We have developed our Contract Manager service which helps tech companies to get contracts negotiated quicker - so they get paid quicker.
